CURRENT POSITION

Sept 2019- present: **Associate Professor**, Center for Anatomy and Cell Biology, Medical University of Vienna, Vienna, Austria

PREVIOUS POSITIONS

- 2016- 2019:** **Assistant Professor**, Center for Anatomy and Cell Biology, Medical University of Vienna, Vienna, Austria
- 2013- 2016:** **Next Generation Fellow (NGF)**, Centre for Trophoblast Research, University of Cambridge, UK
- 2011- 2013:** **Postdoctoral Researcher**, Babraham Institute, Centre for Trophoblast Research, University of Cambridge, UK (Dr Myriam Hemberger's lab)
- 2008- 2011:** **Postdoctoral Researcher**, Stem Cell Institute, University of Cambridge, Cambridge, UK (Dr Brian Hendrich's lab)
- 2003- 2008:** **Ph.D. student**, Center for Molecular Medicine, Austrian Academy of Sciences, Vienna, Austria (Prof. Denise Barlow's lab)

My laboratory combines trophoblast stem cell and organoid models with multi-omics approaches to study the transcriptional regulation of trophoblast cell identity. We explore transcription factor networks operating in trophoblast stem cells - their signalling inputs, hierarchies, interactors, and the downstream outputs (Lackner et al., 2023, *Nat Commun.*; Hornbachner et al., 2022, *PNAS*; Latos et al., 2015, *Nat Commun.*; Latos et al., 2015, *Genes&Dev.*). My fascination with transcriptional control of cell fate dates to my postdoctoral and doctoral training. I studied the role of chromatin remodelling complex in stem cell transitions (Reynolds, Latos et al., 2012, *Cell Stem Cell*; Latos et al., 2012, *Biol. Open*) and transcriptional regulation of genomic imprinting by ncRNAs (Latos et al., 2012, *Science*; Latos et al., 2009, *Development*).

Our laboratory has also developed (in collaboration with Prof. Martin Knöfler's lab) trophoblast and endometrial organoids (Haider et al., 2018, *Stem Cell Reports*; Haider et al., 2019, *Endocrinology*), and used them to investigate how signalling controls cell identity.

GRANTS & FELLOWSHIPS

- FWF P32176** “Deciphering the Erf-NcoR1/2 complex cooperation in TS cells” (2019-2024)
- FWF P31738** “Role of ARID1A in endometrial cancer organoid model” (2019-2023)
- FWF P30941** “Deciphering signalling and transcriptional networks in human uterine organoids” (2017-2021)
- ÖAW DOC Fellowship** for a PhD student Henrieta Papuchova (2022-2024)

The Next Generation Fellowship of the Centre for Trophoblast Research, University of Cambridge (2013-2016)

EMBO long-term Fellowship (2009-2011)

COLLABORATIONS

Prof. Martin Knöfler, Medical University of Vienna, Austria

Dr Sandra Haider, Medical University of Vienna, Austria

Dr Sasha Mendjan, IMBA, Vienna, Austria
